THE KWISTECH
ADVANTAGE

WHITEPAPER

ABOUT US

Hi there,

In the age of AI, gone are the days when you had to invest large sums of money to get your idea off the ground.

In this modern world, anything is possible. Do you want food? Order now. Do you want to see what your friends are up to? Doom scroll. Want to see the latest movie? Netflix and chill.

Life happens at our fingertips.

We can turn our ideas into reality. Technology continues to advance and yet, we are just getting started.

Do you have an idea for an app? Do you need help developing a website? Let us help you achieve your goals.

At Kwistech, we always put people first, and as such, we create solutions that use AI to serve us, to serve humanity.

Contact us to book a free consultation and we will develop a plan to turn your project or idea into reality.

John Kwisses
CEO

INTRODUCTION

**Experience the
Power of ExO™**

OUR MISSION

We create solutions for humanity.

As our world embraces AI, it is important that we humans do not fall behind. At Kwistech, we always put people first, and as such, we create solutions that use AI to serve us, to serve humanity.

OUR GOALS

We have three tenants to our development philosophy:

1. *Governance - We are an Exponential Organization (ExO™) who believes that technology should be human-centric.*

**Cyber Secure
by Design**

2. *Security - We create solutions that are secure by design following the NIST CSF, an industry-recognized framework.*

3. *AI - We embrace the advantages of AI following the NIST AI RMF, a risk-based ethical AI framework.*

**Human-Centric
AI Integration**

OUR ADVANTAGE

BUSINESS PRIORITIES

- Deliver quality solutions that are **cost-effective.**

ADDED PRIORITIES

- Develop quality solutions that are **delivered fast.**

OPPORTUNITIES

- Web development
- App development
- Advisory services

GOVERNANCE

An Exponential Organization (ExO™) is a company that is driven by a Massive Transformative Purpose (MTP). Our MTP is to create solutions for humanity.

Our MTP enables us to leverage new exponential technologies, such as AI, to achieve our mission in an ethical, moral, and purpose-driven way.

SECURITY

Cyber security is a growing concern in this modern world. It is no longer appropriate to consider it an option or an afterthought of systems development. Cyber security threats are a threat to everyone.
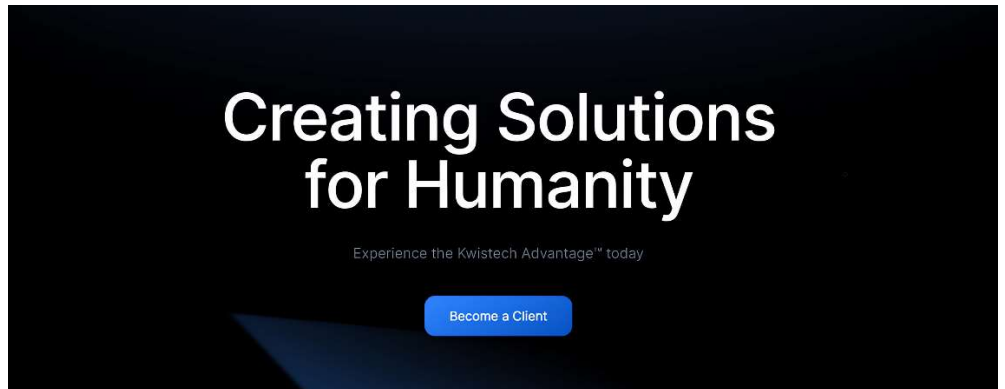

We adopted the National Institute of Standards and Technology (NIST) Cybersecurity Framework (CSF) to secure everything that we do.

The NIST CSF is an industry-recognized cyber security framework that enhances our ability to create and deliver secure solutions.

AI

We adopted the National Institute of Standards and Technology (NIST) Artificial Intelligence (AI) Risk Management Framework (RMF).

The NIST AI RMF is a new framework developed under the U.S. Department of Commerce, which we use to manage AI in a moral and ethical way.
